

MAC LESSON #29

WORD OF THE DAY "WIDGET"

The MAC OS X Operating System, version 10.4, better known as Tiger, brought us all kinds of new things. One of my favorites is the Dashboard, a collection of small programs called widgets that allow you to watch the weather, check the time, track flights, and much more.

In Lesson #22 I brought you the Sing That iTunes widget that provides lyrics to some of the music you listen to on the iTunes Web page.

Now I have another widget for you. It's called the Word of the Day. The Word of the Day widget gives you a brand new word every day, along with the correct way to pronounce it, a definition, and an example of how it would be used in a sentence.

You can select a color for the widget, or have a new color every time you open the widget.

Download the Word of the Day widget by logging on to:

www.apple.com/downloads/dashboard/reference/wordoftheday.html
